Mikołaj Mocek

Software Engineer — Gliwice, Poland

m@mikolajmocek.com | mikolajmocek.com

github.com/Mondonno | linkedin.com/in/mikolajmocek

Profile

Software engineer and startup co-founder working across backend systems, mobile applications and machine learning. Built booking and payment software, developed open-source libraries, and contributed to computer-vision research for wheelchair accessibility. Focused on Go, Python, C++ and Flutter.

Technical Skills

Languages: Go, Python, C, C++, C#, Dart, JavaScript, TypeScript, Bash, HTML, CSS, SCSS

Backend & infrastructure: REST APIs, .NET, Docker, Pulumi, MongoDB, MySQL, SQLite, PostGIS

Applications & ML: Flutter, React, React Native, Electron, Xamarin, Next.js, PyTorch, neural networks

Experience

Co-Founder, CEO & CTO — Jul 2024 – Present
iminti — Poland

- Lead engineering for iminti Go!, a navigation product that helps wheelchair users avoid urban accessibility barriers.
- Develop accessibility mapping and routing with Go, Python, MongoDB and PostGIS, combining spatial data with computer vision.

Lead Software Engineer (freelance) — Sep 2023 – Oct 2025
siłka Z matmy — Poland

- Built a lesson-booking system with electronic payments and calendar-based scheduling.
- Developed network infrastructure and a mail server; automated workflows and trained staff in IT tools.

Lead Software Engineer (freelance) — Sep 2019 – Oct 2025
TRANSLATOR.RYBNIK — Poland

- Worked across software development and IT infrastructure; also held a Data Specialist role from Sep 2023 to Oct 2025.

Project Team Member — Computer Vision — Jun 2024 – Oct 2024
Silesian University of Technology | Project Based Learning — Poland

- Researched wheelchair-accessibility information extraction from panoramic images; the team's neural network achieved 75% accuracy on its test dataset.

Selected Open-Source Projects

nns — Neural Networks from Scratch — Python
Implemented a modular neural-network framework with backpropagation, dense and convolutional layers, optimizers and numerical gradient checking.

Airly.Net — C# / .NET
Built an asynchronous client for the Airly REST API, distributed through NuGet with API documentation and usage examples.

CustomPopUps.iOS — C# / Xamarin.iOS
Created a lightweight library for presenting custom modal interfaces in Xamarin.iOS applications.

Education & Research

Academic Secondary School, Rybnik — Sep 2022 – Present
Affiliated with Silesian University of Technology — Mathematics, Physics, Chemistry

ML and neural-network mentorship at Silesian University of Technology with Dr Roman Kluger (Sep 2023 – Present).

Recognition

iminti team: Golden Wolf — best social project in Poland in the Urban Space category; Silver Wolf — regional distinction, Zwolnieni z Teorii.
