Mikołaj Mocek

Software Engineer

Gliwice, Poland

m@mikolajmocek.com | mikolajmocek.com

github.com/Mondonno | linkedin.com/in/mikolajmocek

Profile

Software engineer combining mathematics, computer science and entrepreneurship to solve real-world problems. Experienced in scalable software, infrastructure, data analysis and machine learning, with a focus on neural networks, algorithms and optimization. Interested in responsible AI, accessibility and turning research into practical solutions.

Technical Skills

Languages: Go, Python, C, C++, C#, Dart, JavaScript, TypeScript, Bash, HTML, CSS, SCSS

Backend & infrastructure: REST APIs, .NET, Docker, Pulumi, MongoDB, MySQL, SQLite, PostGIS

Applications & ML: Flutter, React, React Native, Electron, Xamarin, Next.js, PyTorch, ONNX, neural nets

Experience

Co-Founder Jul 2024 – Present

iminti Poland

- Lead engineering for iminti Go!, a navigation product that helps over 400 wheelchair users monthly avoid urban accessibility barriers. Partnered with Google for Startups and Microsoft for Startups.
- Used Go, Python and MongoDB to combine spatial data with computer vision. Mapped over 200,000 km of sidewalks across Poland, several other EU countries and the US.

Lead Software Engineer (freelance) Sep 2019 – Oct 2025

siłka Z matmy / TRANSLATOR.RYBNIK Poland

- Built a lesson-booking system with electronic payments and calendar-based scheduling with a Mailcow mail server. Supported 300 monthly users with regular bookings.
- Used React, Webpack, Node.js, Express, SQLite, Stripe, Docker, WFirma API, Zoom API and Google Calendar API.
- Worked across software development and IT infrastructure; also held a Data Specialist role from Sep 2023 to Oct 2025.

Project Team Member — Computer Vision Jun 2024 – Oct 2024

Silesian University of Technology | Project Based Learning Poland

- Researched wheelchair-accessibility information extraction from panoramic images; the team's neural network achieved 75% accuracy on its test dataset. Named a laureate in the scientific works contest held by the Silesian University of Technology, placing in the top 7 out of 84 projects. The work was published in POLSL REPOLIS by the Silesian University of Technology.

Selected Open-Source Projects

nns: Neural Networks from Scratch Python

Implemented a modular neural-network framework with backpropagation, dense and convolutional layers, optimizers and numerical gradient checking.

Airly.Net C# / .NET

Built an asynchronous client for the Airly REST API, distributed through NuGet with API documentation and usage examples.

Education & Research

Silesian University of Technology, Gliwice Oct 2026 – Present

Silesian University of Technology B.Sc. in Computer Science (Applied Profile) at the Faculty of Applied Mathematics

Academic Secondary School, Rybnik Sep 2022 – May 2026

Affiliated with Silesian University of Technology Mathematics, Physics, Chemistry

ML and neural-network mentorship at Silesian University of Technology with Dr Roman Kluger, Mgr Michał Wieczorek and Dr Adrian Kapczyński (Sep 2023 – Present).

Recognition

Semifinalist in the Polish Informatics Olympiad: Scored 449 out of 800 points in the first stage, qualifying for the semifinals (2026).
